

SMOKE CAR

Design: Bevk Perović Arhitekti

Floor lamp

100% recyclable, 100% ironic, 100% iconic

Prototypical elements of suburbia transformed into central elements: icons for our homes.

The Smoke collection is a series of floor lamps based on scaled-down prototypical elements of suburbia - the factory, the car, the parking lot, the house - isolated from their natural context and transformed into iconic additions for the home or office, belching "smoke", illuminating spaces and more. Floor lamps meant to light up living and working environments - to be useful and critical simultaneously - comment on our everyday lives, surrounded by pollution and consumption.

They're big enough to be used in both private and public spaces and are able to function independently or in combination in groups as small urban designs, emitting light through recyclable and easy-to-maintain Tyvek® "smoke" shapes.

Material: computer-cut and welded metal, Tyvek® diffuser, Velcro®

Colours: off-white, dust blue, dirty yellow, drab olive, musty gray,
