

Contract Table

Charles & Ray Eames, 1950

vitra.

Contract Table

The Eames Contract Tables were created together with the chairs of the Aluminium Group and share the latter's distinctive cruciform base. The tables were part of a series of designs developed by Charles and Ray Eames to provide high-quality furniture for outdoor use. Today the version with a solid core table top and powder-coated base remains an excellent choice for any outdoor setting.

Materials

- **Table top:** available in 2 materials. Melamine faced (25 mm) with smooth straight plastic edge or solid core material (12 mm) in white with black edge.
- **Base:** tilt-free column, four-legged base in die-cast aluminium. Available in three versions: chrome-plated base and column in basic dark, or base and column powder-coated in silver or dark grey.
- **Use:** the powder-coated base and solid core

table top are suitable for outdoor use.
