The aesthetic hallmark of the .03 chair is its sleek, slim shape – a design that can be seen as an expression of the concept ‘less is more’. At the same time, the chair is unexpectedly comfortable: made of resilient polyurethane integral foam, the linear shape of the seat shell adapts to the body. When the sitter leans back, the

upper part of the backrest yields slightly – a pleasant sensation created by the integrated leaf springs. The extraordinary comfort of .03 is first revealed upon use.

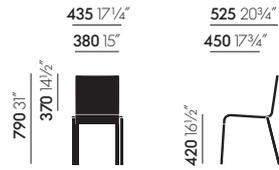

#### Materials

- **Seat shell:** integral skin polyurethane foam. Shell with upholstered effect, cantilever construction on tubular steel frame. Flexible backrest with integrated leaf springs.
- **Base/stackability:** back legs in tubular steel, front legs in aluminium profile, powder-coated smooth finish (silver RAL 9006) or chrome-plated. Stacking and non-stacking versions. Up to 12 chairs can be stacked on the floor, up to 20 chairs on a stacking trolley. Equipped with plastic glides for carpet or felt glides for hard floors.
