

HAL Table

Jasper Morrison, 2010

vitra.

HAL Table

The HAL Table was designed by Jasper Morrison as a companion table for the HAL Chair. The round and square table tops are exceptionally robust. Stackable in all versions, the HAL Table with stainless steel legs can also be used outdoors. With a chrome-plated base, the table makes a perfect match for HAL Chair models with a chrome finish.

Materials

- **Table top:** solid core material with black edge (12 mm) in white, pastel grey or black. The solid core table top in black has an additional anti-fingerprint coating.
- **Base:** stainless steel or chrome-plated with integrated stacking protectors and levelling glides. If necessary, the individual table legs can be removed with a built-in click mechanism.
- **Applications:** with a stainless steel base, the HAL Table is also suited for outdoor use.

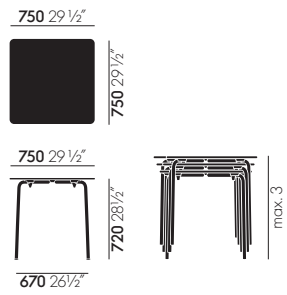

HAL Table

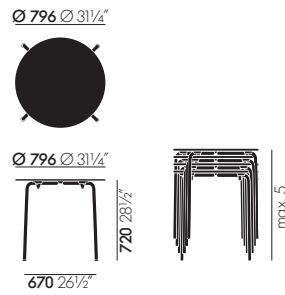

When the black, white or pastel grey table tops in solid-core material are combined with the stainless steel base, the HAL Table can also be used in outdoor areas.
