

LED₄

LED₄

LED₄ provides excellent lighting possibilities to all kinds of work spaces, leisure rooms, shop interiors and beyond. LED₄ illuminates the space efficiently and with sophistication.

LED₄ received the international red dot award in product design in 2011.

Designed by Tunto founder Mikko Kärkkäinen.

winner 2011

DESIGN

LED₄ is available in oak, walnut, and birch. The woods are hand-picked to ensure the best possible quality and certified to support responsible forest management. The oak and walnut are from North America, and the birch comes from Finland.

The lamp uses the innovative, touch-sensitive technology that Tunto is renowned for. It emits an indirect and efficient light that's perfect for lighting anything from a desk environment to a showroom table. LED₄ is environmentally friendly, as it uses little electricity (15 W).

Choose your favourite colour from the eleven Tunto colours.
