

STEAMERY

Steam Water

Steam water together with a steamer is the perfect duo. When you are using steam water, you never need to descale your steamer. If you live in an area with hard water, it is ideal to use steam water instead of tap water.

HOW TO USE

Fill up the water tank with steam water and your steamer is ready to be used.

SPECIFICATIONS

- Distilled water 750 ml
- Produced in a climate-neutral factory in Sweden

FEATURES

- Leaves no residue in your steamer
- No need to descale your steamer
- Ideal if you live in an area with hard water
- Also great for steam irons and air humidifiers
